**Risk Disclosure** Futures trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or lifestyle. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results.

## What is the BET Limit Buttons and OCO Timers for NinjaTrader 8

Here at Bars Edge Trader, we will use Limit orders 90% of the time. Over time we developed a button pack that made it easier to run a limit order, we also wanted to use a timer to run an OCO order "One Cancels the Other" to take advantage of news cycles semi-automatically so we may concentrate on other markets during the day.

We wanted to take advantage of using different ATMs and accounts on the same chart. For instance, if we see the trend as mainly short but with reversals that are long bars we may setup an ATM to only take a few ticks long so as to scalp that entry but keep a 5point ATM for going short to follow the trend. This flexibility has help us stay profitable.

### Specifications and Requirements;

NinjaTrader 8 desktop Chart

TIF (Time in Force) DAY ONLY

## Stop Limit orders ONLY

Developed and Tested for Future Traders

We have not tested for FOREX or Stocks

## Properties, All TIF are DAY

Limit1 Buy Parameters "this is for Stop Limit Buy Order Button"

**ATM Template Name**, this is the name of the ATM you created and want to use for the Buy Limit button.

**Account Name**, this is the account you want to use, this can be Numbers or Letters e.g. "Sim101, PlayBack101, 45768, MySimAccount1".

Long Limit Ticks, the ticks above the current price you want to place the Buy Limit.

**Order Qty,** the order quantity of the Limit order, this is independent of the ATM you have created to give you the greatest possible flexibility. You may want to use the same ATM for both Buy and Sells, but use different Quantities due to market conditions at that time.

Limit2 Sell Parameters "this is for Stop Limit Sell Order Button"

**ATM Template Name**, this is the name of the ATM you created and want to use for the Sell Limit button.

**Account Name**, this is the account you want to use, this can be Numbers or Letters e.g. "Sim101, PlayBack101, 45768, MySimAccount1".

Short Limit Ticks, the ticks below the current price you want to place the Sell Limit.

**Order Qty,** the order quantity of the Limit order, this is independent of the ATM you have created, we wanted to give you the greatest possible flexibility. You may want to use the same ATM for both Buy and Sells, but use different Quantities due to market conditions at that time.

**Limit3 OCO Parameters** "this is for OCO Button "One Cancels the Other" Stop Limit Buy/Sell Order"

**ATM Template Name**, this is the name of the ATM you created and want to use for the Buy/Sell OCO Limit button.

**Account Name**, this is the account you want to use, this can be Numbers or Letters e.g. "Sim101, PlayBack101, 45768, MySimAccount1".

**Long/Short Limit Ticks,** the ticks above & below the current price you want to place the Buy/Sell Limit Order.

**Order Qty,** the order quantity of the Limit order, this is independent of the ATM you have created, we wanted to give you the greatest possible flexibility. You may want to use the same ATM as both Buy and Sells, but use different Quantities due to market conditions at that time.

LIMIT BUTTONS & OCO TIMERS 3.0

Time Limit OCO Parameters, this is the first timer for a OCO entry,

**Use Limit OCO1 on Time**, Check box, checking this will cause the program to look at the time and insert an OCO order based on the below parameters. **NOTE:** *If you set this check box and the time has already passed this may cause an immediate entry!* 

**Limit OCO1 Chart Time Start,** set this time when you want an OCO limit entry to occur. E.g. 9:00 am *CME time CPI numbers are announced and you want to enter then.* 

**Limit OCO1 Chart Time Stop and Cancel**, sets the time you want to stop waiting for a market entry and if there isn't an entry you want to cancel the OCO. Make sure you give yourself enough time, if you are using a 5-minute bar you might want to wait 10 minutes before canceling out. This will also uncheck the Limit time check box.

**ATM Template Name**, this is the name of the ATM you created and want to use for the OCO Limit time entry.

**Account Name**, this is the account you want to use, this can be Numbers or Letters e.g. "Sim101, PlayBack101, 45768, MySimAccount1".

**Long/Short Limit Ticks**, the ticks above & below the current price you want to place the Buy/Sell Limit Order OCO.

**Order Qty,** the order quantity of the Limit order, this is independent of the ATM you have created, we wanted to give you the greatest possible flexibility. You may want to use the same ATM as both Buy and Sells, but use different Quantities due to market conditions at that time.

**OCO1 Box Color for Entry**, if an entry did occur a box is placed on the bar an entry occurred. This made it easier to monitor multiple markets. You can always set this transparent if you don't want to see it.

×

Information that may be displayed; all with time date stamp when the OCO timers' entries occurred.

**TIP:** *Right click on the window and set "Always On Top" this will keep the window from being minimized.* 

**OPPS Screen,** the app will detect if the account name or the ATM name is incorrect. Also, NinjaTrader will also throw out several error screens if things are mis-spelled or incorrectly entered when working with the LIMIT entries and OCOs.
